

MOBILE CARTS

Get Mobile with Powerplay RollAbout Carts

These mobile systems offer seamless connection to personal desktop systems or high end dedicated room installations.

RollAbout 1000

ENTRY LEVEL CONFERENCING...

The RollAbout 1000 series is an entry level mobile cart that has all the features and performance of higher end systems, less the capacity for additional cameras and microphones. This durable, mobile cart is ideal for medium sized classrooms and conference rooms.

The RollAbout 1000 is equipped with a large flat panel monitor which is ideal for medium size groups. The standard package comes with a single, echo canceling microphone and a Pan-Tilt-Zoom camera.

RollAbout 2000

HIGHLY CUSTOMIZABLE CONFERENCING...

The RollAbout 2000 series has features and performance typically only found in more expensive dedicated room systems. This durable, mobile cart is ideal for classrooms and conference rooms. The RollAbout 2000 implements the most advanced video technology and boasts the highest video resolution on the market (displays four CIF video streams simultaneously).

The RollAbout 2000 is equipped with a high lumen projector that is ideal for projecting the integrated video and collaboration display.

The standard package comes with a wireless microphone, a wired gooseneck microphone, speakers and a Pan-Tilt-Zoom camera. Additional A/V ports allow you to customize your configuration by adding multiple microphones, cameras and other video playback devices such as VCRs and DVDs.

MOBILE CARTS

Get Mobile with Powerplay RollAbout Carts

Don't tie up dedicated rooms that can only be used by a few. The RollAbout series is an affordable way to bring high-end videoconferencing to everyone. Simply roll it down the hall and plug into your network. Its that simple - Videoconferencing when you want, where you want.
